## WHY CLEAN & MAINTAIN YOUR AC?

Maximizing and maintaining clean air conditioning units is without a doubt one of the most necessary and vital components in managing an efficient and hygienic property. If AC systems are not maintained, air laden with contaminants such as mold, dirt, and dust can be breathed regularly by every customer that enters the facility, leading to potentially major health liabilities such as Legionnaires disease.

Dirty coils force compressors to run longer and work harder than required, decreasing component life and increasing energy usage meaning the facility's utility costs can skyrocket. Regular cleaning of the system will prevent these problems from occurring and ensure the highest air quality is maintained.

- ✓ **Improved Air Quality:** A/C cleaning reduces odors and eliminates liabilities due to airborne bacteria
- ✓ **Reduced Energy Consumption Costs:** Clean coils transfer air more efficiently, improving flow which increases energy savings
- ✓ **Less Overall Maintenance Cost:** With fewer major A/C problems, your engineering and management team can focus on other operational issues
- ✓ **Extended Equipment Life:** A regularly maintained system can last 10 to 15 years, delaying capital expenditures caused by corrosion and subsequent unit problems

## CHELA GUARANTEES

- ✓ **Quality, Integrity & Service:** Trusted for over 100 years by professionals working across all industrial sectors
- ✓ **Effective, Versatile & Safe Chemicals:** All of our lines are fully biodegradable, effective and provide maximum operator safety & comfort
- ✓ **Increased Stock Control & Decreased Stock Inventory:** Our versatile range allows consolidation of cleaning product stocks and lowers the number of products needed to maintain high efficacy in operations

## CHELA COIL BRIGHT

### CLEANER AND BRIGHTENER FOR OUTDOOR CONDENSER & SPINE FIN COILS

A biodegradable, concentrated, powerful alkaline cleaner and brightener for outdoor condenser & spine fin coils. Its high foaming action easily removes grease, grime and other sticky exhaust residues found on condenser coils. Highly efficient as it cleans and brightens simultaneously, ensuring that the coils operate at full capacity.

- Economical - dilutes with up to 10 parts of water
- Alkaline formulation – excellent on greasy coils
- Cleans “difficult to reach” areas
- Enhances the efficiency of air conditioning units
- Non acidic - safer to use

Pack sizes: ..... 4 x 4 L, 20 L, 200 L

DIRTY COIL

FOAMING

CLEAN COIL

## CHELA COIL SAFE

### SELF-RINSING COOLING COIL CLEANER AND DEODORIZER

A biodegradable, self-rinsing, concentrated, evaporator coil cleaner and deodorizer. Its hassle-free high performance formulation utilizes the air conditioner’s condensation to naturally flush away dirt, grease and other accumulations from chiller & cooler coils. Continuously protects filters and metal from corrosion, while leaving a preventive thin film to increase the efficiency of the filter. Its deodorizing power eliminates & prevents bad odours from being circulated within the system.

- Economical - dilutes with up to 10 parts of water
- Safe to use - non-acidic, non-caustic, non-corrosive
- Corrosion inhibitors – to further protect
- Deodorises – ensuring air quality
- Is self-rinsing – utilises condensation water
- Versatile - can be also used as a filter cleaner & adhesive

Pack sizes: ..... 4 x 4 L, 20 L, 200 L

## CHELA BLUE TAB

### CONDENSATE DRAIN PAN TABLETS

An easy to use fully biodegradable, solid structure tab, for the prevention of scale & bacteria build-up in drain pans found in air conditioners, humidifiers and refrigerators.

- Highly efficient drain pan treatment tablet - fully dissolves over time, leaving no residues
- Ensures clean air for minimum of 3 months
- Prevents foul odours, scale & bacteria build-up
- Prevents condensate over flow
- Highly economical scaling from small to large units

Pack sizes: ..... 144 Tabs / Tub

Blue Tab
